DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 5, 2002 has been entered.

2. The amendment filed August 5, 2002 has been entered. It is noted that in view of the new amendment practice under 37 CFR 1.121 which became mandatory for all amendments on March 1, 2001, and due to the limited amount of examining time per application, if the amendment contains changes to existing language that requires a marked-up version showing those changes, the Examiner is relying upon the marked-up version(s) for examination of the application. It is applicant's responsibility to ensure that the clean version(s) is (are) the same as the marked-up version(s). It is further noted that the clean version(s) is (are) considered to be the Official version(s).

Information Disclosure Statement

3. The information disclosure statement filed August 5, 2002 (paper no. 19) has been received and the references listed thereon have been considered. It is noted that the listing of Bittner et al. has been lined-out since it has already been made of record (see paper no. 2).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 2 and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by Bittner et al., pn 5,290,033.

Bittner et al. discloses a terminal with every structural limitation of the claimed invention including a housing (e.g., shown in Figures 1 and 6); a currency acceptor (e.g., 215); a credit display means (e.g., 206); a dispensing means (e.g., 204); a detector means (e.g., 224); and credit means (e.g., 228).

6. Claims 41, 44, 45, 47 and 48 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Irvine, pn 4,454,973.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 37 and 38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bittner et al., pn 5,290,033, in view of Burr, pn 5,222,624.

Bittner et al. discloses a terminal with almost every structural limitation of the claimed invention as described above but lacks one of the ticket types being lottery tickets stored in strips in which individual tickets are delineated from one another by lines of weakness. However, the Examiner takes Official notice that these types of tickets are old and well known in the art as evidenced by Burr and provide various known benefits including easy handling for shipping, storing and loading into the dispensing device. Therefore, it would have been obvious to one having ordinary skill in the art to provide such tickets in the device of Bittner et al. and, if

Art Unit: 3724

necessary, to configure Bittner's device to dispense such tickets for the well known benefits including those described above.

9. Claims 42, 43 and 46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Irvine, pn 4,454,973.

Irvine discloses a device with almost every structural limitation of the claimed invention but lacks a controller. However, the Examiner takes Official notice that such bursting configurations with controllers are old and well known in the art and provide various known benefits including an efficient mode of separating perforated articles. Therefore, it would have been obvious to one having ordinary skill in the art to provide a controller on the device of Irvine for the well known benefits including that described above.

Additionally, Irvine lacks the separator member having a helical protrusion. However, the Examiner takes Official notice that these types of bursting members are old and well known in the art for provide a concentrated progressive force along a web to effect bursting with a reduced amount of pressure applied to the web. Therefore, it would have been obvious to one having ordinary skill in the art to provide a separator member having a helical protrusion for the well known benefits including those described above.

Allowable Subject Matter

10. Claim 7 is allowable over the prior art of record.
11. Claims 8 and 39 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Clark Dexter whose telephone number is (703) 308-1404. The examiner's typical work schedule is Monday, Tuesday, Thursday and Friday, and he can be reached during normal business hours on these days.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Allan Shoap, can be reached at (703)308-1082.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703)308-1148. The fax numbers for this group are: formal papers - (703)305-3590; informal/draft papers - (703)305-9835.
